To pursue quality as an attitude and strive to develop students with rational thinking based on a strong foundation of ethics and moral values, build on the proven success of Indian education, while assimilating developments of the modern scientific world in our curriculum.

Our Mentor

Dr. Priyanka Mehta **Director Principal**

An eminent educationist with over 25 years of experience in the field of education. She has been widely appreciated for her work in the field and has been honored with several awards and recognitions. She firmly believes in creating value for society through nurturing and empowering young minds, leading them to become aware, responsible and ethical human beings who believe in strong values and relations in the modern world.

A totally peoples' person, she enjoys being with children and learns from their experiences, joys, and failures. Spirituality and values are very close to her heart and she believes that strong roots of values and culture strengthen character and ensure righteousness. She inspires as a fine blend of tradition and modernity, where Love for the motherland settles the soul and modernity of thought liberates the mind to think, innovate and create.

Her guiding lines are, "One day we are all going to be a memory....we must truly try to be a good one. The smiles on the faces of my students, as they express their love and trust, encourage me to work for them and give purpose to my life. I am driven by their faith and love. Their never-ending support pushes me further and allows me to be me. I keep reminding myself to be a learner and seek means and ways to enrich myself.

I am forever inspired by the lines:

"Life is short, break the rules, forgive quickly, kiss slowly, love truly, laugh uncontrollably, and never regret anything that made you smile."

Twenty years from now you will be more disappointed by the things you didn't do than by the ones you did. So throw off the bowlines. Sail away from the safe harbor. Catch the trade winds in your sails... Explore. Dream. Discover....."

ROTE LEARNING VS EXPERIENTIAL LEARNING

Rote Learning is the process of memorizing information based on repetition. Learning information until it's remembered. Repetitive Learning or learning by rote has long been replaced by 'Learning by Doing.' which means the learning process has now shifted from Rote Learning to Experiential Learning catering the need of young learners. Experiential Learning training methodology use critical thinking, problem-solving and decision making.

**"You don't learn to walk by following rules.
You learn by doing, and by falling over."**

The process of experiential learning involves both self-initiative and self-assessment as well as hands-on activity, so students and teachers alike can benefit from experiential learning opportunities.

**'LEARNING IS EXPERIENCE, EVERYTHING ELSE IS JUST
INFORMATION'**
