To pursue quality as an attitude and strive to develop students with rational thinking based on a strong foundation of ethics and moral values, build on the proven success of Indian education, while assimilating developments of the modern scientific world in our curriculum.

Our Mentor

Dr. Priyanka Mehta **Director Principal**

An eminent educationist with over 25 years of experience in the field of education. She has been widely appreciated for her work in the field and has been honored with several awards and recognitions. She firmly believes in creating value for society through nurturing and empowering young minds, leading them to become aware, responsible and ethical human beings who believe in strong values and relations in the modern world.

A totally peoples' person, she enjoys being with children and learns from their experiences, joys, and failures. Spirituality and values are very close to her heart and she believes that strong roots of values and culture strengthen character and ensure righteousness. She inspires as a fine blend of tradition and modernity, where Love for the motherland settles the soul and modernity of thought liberates the mind to think, innovate and create.

Her guiding lines are, "One day we are all going to be a memory....we must truly try to be a good one. The smiles on the faces of my students, as they express their love and trust, encourage me to work for them and give purpose to my life. I am driven by their faith and love. Their never-ending support pushes me further and allows me to be me. I keep reminding myself to be a learner and seek means and ways to enrich myself.

I am forever inspired by the lines:

"Life is short, break the rules, forgive quickly, kiss slowly, love truly, laugh uncontrollably, and never regret anything that made you smile."

Twenty years from now you will be more disappointed by the things you didn't do than by the ones you did. So throw off the bowlines. Sail away from the safe harbor. Catch the trade winds in your sails... Explore. Dream. Discover....."

“Be thankful for what you have; you will end up having more”

Worker's day is a reminder that the world is built on the contribution of workers working hard and all of them deserve equal respect from all of us. Our Little Sarvottamites expressed their gratitude towards school helpers by lending a hand in their cleaning tasks. Gratitude can transform common days into thanksgiving, turn routine jobs into joy, and change opportunities into blessings. TEACHERS CORNER

IMPORTANCE OF THEMATIC LEARNING

Thematic learning is based on the idea that knowledge acquisition is efficient among students when they learn in the context of a coherent and holistic way and when they can associate whatever they learn to their surroundings and real-life examples. Thematic instruction seeks to put the cognitive skills such as reading, thinking, memorizing, and writing in the context of a real-life situation with the broad aim to allow creative exploration. Thematic learning is a newer concept in pedagogy. It is proved to be a powerful instructional method for integrating various concepts in the curriculum by daily life examples and experiences. Thematic learning is geared toward the accommodation of the interests of individual learners and abilities. Thematic Learning techniques foster teamwork and support in the group since the group is a mixture being taught by a team of two facilitators. Thematic learning comprises teams with varied sizes, and work using problem-solving techniques and project methods. To conclude it can be seen that including cross-curricular links "provides pupils with the broad curriculum to which they were entitled." This leads to the children growing in self-confidence which helps them to tackle more challenging work and develop a positive attitude towards school life and learning.
